[] Tab B shows the recent sharp drop-off in supergrade promotions.

3. (U/AIUO) Staff Position:

a. With respect to the recommended promotions to GS-17, GS-18 and SPS, there is concern only where a promotion will result in a PRA situation with no stated plan for proper reassignment within the next two years as required. Consequently, and especially in view of concern about the number of PRA's in senior positions, I do not support one particular recommendation for a promotion in this category to GS-17.

I have checked the figures and I believe they are accurate. I would have written the memo a little differently in the interest of clarity, however, the conclusion and recommendations are clear cut and I suggest you send it on.
